

Huapont launch a new product on China market

January 2019, Chongqing Huapont successful launches a new product Clobetasone Butyrate Cream (15g, 0.05%) on China market.

Clobetasone butyrate is classed as a moderately potent topical corticosteroid, it has been shown to be more effective than hydrocortisone 1.0% for treating atopic eczema, and skin thinning has not been reported with short term use. There was negligible systemic absorption.

Clobetasone Butyrate 0.05% is a moderately potent topical corticosteroid. Clinical experience shows that moderate strength topical corticosteroids act more quickly than hydrocortisone and as a result can reduce the total amount of drug that is used.
